

# You are invited to feedback into the Queensland Skills Plan

## DETA Regional Industry Forums

Department of Education Training and the Arts Industry Engagement Initiative

These forums aim to bring together local and regional employers, industry bodies and stakeholders to evaluate skilling and workforce management strategies and collaborate on skilling and training solutions.

The main focus of the sessions will be around the document – Queensland Skills Plan in Progress: a discussion paper (attached).

The Regional Directors are driving these forums which will be attended by the Director-General Rachel Hunter, or her delegate, and key regional industry stakeholders.

It is very important that the industries and their sectors give regional input to the state of their relationships with the education and training systems.

Are these systems efficient in meeting workforce development and to attract, recruit and retain staff who are well qualified to do their job.

If you would like to attend please contact the relevant contact person in your region.

The Health and Community Services Workforce Council is also providing an opportunity to gather feedback. If you are unable to attend one of the DETA forums you can still provide feedback by visiting [www.workforce.org.au](http://www.workforce.org.au) to complete our online survey.
