

Mapping Template

Unit Title: CHCOHS302A Participate in safety procedures for direct care work

Critical aspects of assessment

- Ability to identify manual handling risk and modify work practices appropriately
- Ability to use relevant equipment to reduce risk of manual handling
- Ability to identify risks to personal safety and apply accepted practices to minimise risk
- Ability to demonstrate standard infection control procedures
- Ability to work safely, and follow the enterprise's OHS policies and procedures
- Ability to identify, report and manage (within the limits of their control) hazards

Please note the following points from the Evidence Guide:

- It is expected that this competency may be applicable in combination with other industry, occupation or workplace-specific competencies. This unit will be assessed in the workplace in as holistic a manner as is practicable and may be integrated with the assessment of other relevant units of competency
- Assessment of manual handling performance criteria 1.3 and 1.4 must have a practical component that enables assessment of the physical capability and motor skills to meet the performance criteria

Please also refer to Range of Variables and complete Evidence Guide before mapping existing resources to a unit of competency.

Underpinning Knowledge	Current Learning Resources	Current Assessment Resources
<ul style="list-style-type: none"> • Knowledge and understanding is required of the workplace OHS system sufficient to recognise situations affecting OHS and to take the appropriate action to rectify the situation. This includes specific awareness of manual handling hazards as well as general awareness of other hazards that occur in the sector. • Workers must exercise their duty of care within the respective scope of responsibilities in accordance with general OHS acts and regulations as well as respective state and national standards. • With the exception of manual handling, workers do not need to be able to use specific risk assessment tools. They shall however understand basic concepts of likelihood of occurrence and consequences (severity) of injury. <p>Competence includes the ability to:</p> <ul style="list-style-type: none"> • Access and use appropriate equipment, including those used for manual handling. • Apply and describe procedures for: <ul style="list-style-type: none"> - Recognising hazards, particularly with regard to manual handling, in the workplace - Reporting hazards identified using documented organisational processes • Understand the meaning of OHS signs and symbols relevant to the work area • Communicate OHS issues to designated personnel • Locate and follow OHS procedures • Solve problems 		

Element	Performance Criteria	Current Learning Resources	Current Assessment Resources
<p>1. Identify manual handling hazards, assess related risk and follow risk minimisation procedures.</p>	<p>1.1 Identify manual handling hazards.</p> <p>1.2 Assess the risk using the tools described in the Manual Handling Code of practice for their state</p> <p>1.3 Apply recognised control measures for manual handling risk</p> <p>1.4 Follow established manual handling procedures and work instructions for minimising manual handling risk</p>		
<p>2. Identify sources of risks to personal safety, assess the level of risk and follow risk minimisation procedures</p>	<p>2.1 Identify sources of threat to personal safety and assess level of risk</p> <p>2.2 Identify environments, situations and client-related risk factors that have a risk of personal threat</p> <p>2.3 Apply practical strategies and enterprise procedures to minimise risk</p>		

Element	Performance Criteria	Current Learning Resources	Current Assessment Resources
<p>3. Identify sources of infection and apply industry accepted practice to minimise risk of infection to themselves, clients and others</p>	<p>3.1 Identify risks of infection</p> <p>3.2 Apply standard infection control procedures as part of their work routine</p> <p>3.3 Recognise situations when additional infection control procedures are required</p> <p>3.4 Apply additional infection control procedures as part of their work</p> <p>3.5 Identify other sources of infection for workers</p>		
<p>4. Identify other hazards and assess risk.</p>	<p>4.1 Identify other hazards in the work area during the performance of duties..</p> <p>4.2 Assess level of risk</p>		

Element	Performance Criteria	Current Learning Resources	Current Assessment Resources
<p>5. Follow procedures and strategies for risk control</p>	<p>5.1 Report hazards in the work area to designated personnel according to workplace procedures</p> <p>5.2 Follow accurately workplace procedures and work instructions for controlling risks with minimal supervision.</p> <p>5.3 Whenever necessary, within the scope of responsibilities and competencies, follow workplace procedures for dealing with incidents, fire and/or hazardous events.</p>		
<p>6. Contribute to OHS in the workplace.</p>	<p>6.1 Describe employee rights and employer obligations regarding consultation on OHS matters</p> <p>6.2 Raise task and/or job specific OHS issues with appropriate people in accordance with workplace procedures and relevant OHS legislative requirements</p>		

Element	Performance Criteria	Current Learning Resources	Current Assessment Resources
	<p>6.3 Contribute to participative arrangements for OHS management in the workplace within organisational procedures and the scope of responsibilities and competencies</p> <p>6.4 Provide feedback to supervisor on hazards in work area in line with organisational OHS policies and procedures</p> <p>6.5 Provide support in implementing procedures to control risks in accordance with organisational procedures</p>
